which allows you to see the footnotes. Then, type over sections of the template or cut and paste from another document and use markup styles. The pull-down style menu is at the left of the Formatting Toolbar at the top of your Word window (for example, the style at this point in the document is “Text”). Highlight a section that you want to designate with a certain style, then select the appropriate

This paragraph of the first footnote will contain the date on which you submitted your paper for review. It will also contain support information, including sponsor and financial support acknowledgment. For example, “This work was supported in part by the U.S. Department of Commerce under Grant BS123456”.

The next few paragraphs should contain the authors’ current affiliations, including current address and e-mail. For example, F. A. Author is with the National Institute of Standards and Technology, Boulder, CO 80305 USA (e-mail: author@boulder.nist.gov).

S. B. Author, Jr., was with Rice University, Houston, TX 77005 USA. He is now with the Department of Physics, Colorado State University, Fort Collins, CO 80523 USA (e-mail: author@lamar.colostate.edu).

T. C. Author is with the Electrical Engineering Department, University of Colorado, Boulder, CO 80309 USA, on leave from the National Research Institute for Metals, Tsukuba, Japan (e-mail: author@nrim.go.jp).

--First, Layout.

--Second to the Form Layout, and

The author affiliation textbox should be at the bottom of the left column, instead of spreading across two columns.

All authors’ contact emails should be included.
Make sure there is no excessive space due to figure location shifting.
Numbering is aligned to right.

Indentation spacing is not excessive.

The reference text is justify-aligned.
Axis title, number, label, legend font should be similar in size with the texts in the manuscript.

Common error: after scaling, the legend font becomes too small to read.

Unless necessary, figures should not have border lines outside the plot or figure.

Figure caption should be Justify-aligned.

Fig. 1. Magnetization as a function of applied field. Note that “Fig.” is abbreviated. There is a period after the figure number, followed by two spaces. It is good practice to explain the significance of the figure in the caption.
Caption for the Visual Summary.

Take-Home Messages
• What are the innovative features of utilizing electromagnetics for biomedical applications in this manuscript, in one sentence?
• What is the conclusion in this manuscript, in one sentence?
• What are the targeted biological and/or medical applications, in one sentence?
• What is the significance/breakthrough of this work?
• Accomplishments in this manuscript you would like to highlight that are not mention above, for our readers, in one sentence?
